Kota Jakarta Selatan, DKI Jakarta

SUMMARY

Full Stack Developer and Computer Engineering student experienced in modern web architectures. Proficient in Next.js, Node.js, TypeScript, and cloud databases. Proven ability to build scalable full-stack applications with optimized database performance and high reliability. Explore my complete portfolio at:

EXPERIENCE

02/2026 - Present	Staff Software Engineering Exercise FTUI ↗ Engineered 'Ruang Aksara', a scalable digital reading platform. Optimized NeonDB database queries to ensure rapid content loading and smooth text rendering. Developed efficient Node.js backend APIs for real-time chapter updates and progress tracking while collaborating in an agile cross-functional team
11/2024 - Present	Software Engineering Student Member Google Developer Groups on Campus (GDGoc) Universitas Indonesia ↗ Engaged in intensive software engineering workshops and community events focused on modern technology ecosystems. Developed deeper technical knowledge in full-stack architectures, SDLC models, and industry-standard coding practices while collaborating with peer developers.

EDUCATION

08/2024 - Present	Computer Engineering Universitas Indonesia Maintained a high cumulative GPA of 3.85 / 4.00, demonstrating strong academic excellence and dedication. Completed rigorous coursework with strong foundations in Algorithm Programming, Object-Oriented Programming (OOP), Data Structures, and Database Systems.
07/2021 - 06/2024	Natural Sciences (MIPA) SMAN 37 Jakarta Graduated with a strong academic focus on Mathematics and Physics, laying a solid foundation for logical and analytical problem-solving.

SKILLS

Next.js	Advanced	Tailwind CSS	Advanced
React	Advanced	NeonDB	Intermediate
JavaScript	Advanced	Supabase	Advanced
TypeScript	Advanced	MongoDB	Advanced
Node.js	Advanced	Neo4j	Intermediate
