EDUCATION

2024 - Present

UNIVERSITAS INDONESIA

- Bachelor of Computer Engineering
- GPA: 3.85 / 4.00

2021 - 2024

SMAN 37 JAKARTA (MIPA)

SKILLS

- Teamwork
- Time Management
- Communication
- Critical Thinking
- Python
- C++
- C
- Java
- React, JavaScript, TypeScript
- Next JS
- Tailwind CSS
- Neon DB, Mongo DB
- PostgreSQL
- Figma

NAUFAL RAHMAN

Undergraduate Student, Computer Engineering – Universitas Indonesia

PROFILE

Computer Engineering student at Universitas Indonesia, actively engaged in IKM FTUI. Dedicated to developing high-performance software with a strong emphasis on intuitive UI/UX design. Equipped with advanced problem-solving skills and a keen eye for detail, consistently delivering innovative, user-friendly applications through efficient collaboration and agile time management.

EXPERIENCE

GDGoc UI - Software Engineering Student Member

2024 - PRESENT

Participated in intensive software engineering workshops and community events. Deepened knowledge in modern web development architectures, software development life cycle (SDLC), and industry-standard coding practices. Collaborated with peer developers to solve technical challenges.

NEST UI - Design Division

2025 - PRESENT

Responsible for translating requirements into intuitive digital experiences by creating high-fidelity wireframes and creative design using Figma. Collaborated closely with stakeholders to deliver user-centric designs that align with project goals and technical constraints.

Innovare UI - Design Production

2025 - PRESENT

Produced high-impact marketing collateral, including digital posters and social media assets. Using Figma to create visually engaging promotional materials that enhance brand identity and drive user engagement across various digital platforms

Full Stack Developer (Independent Project 1) - Tweeter App

Architected a high-fidelity social networking platform. Engineered real-time interaction modules using Next.js 15 Server Actions and Drizzle ORM to handle instant liking, commenting, and posting. Optimized mobile performance by implementing responsive blurring techniques and a global loading state management system.

Full Stack Developer (Independent Project 2) - iBuiltThis App

Designed and developed a project-sharing platform where users can showcase websites. Engineered a dynamic 'Trending Algorithm' that automatically highlights projects with over 100 votes to increase visibility. Implemented complex features including user authentication, real-time voting system, and responsive UI using Next.js and Tailwind CSS.

Frontend Developer (Independent Project 3) - Personal Portfolio

Designed and developed a high-performance portfolio website using Next.js (App Router), TypeScript, and Tailwind CSS. Architected a custom dark mode system using React Context and local storage persistence. Implemented responsive mobile-first navigation with smooth animations and modular component design to ensure maintainability and scalability.
